The problem with B2B today.

People often ask me . . .

What B2B Standards should I use for my industry?

Can I use the same standard with other industries?

Can you help me to encourage my trading partners to adopt a common standard?

3

BizDex
www.bizdex.com.au

So what is BizDex?

- A way for business to fairly and efficiently connect and exchange data electronically that is;
 - Low cost
 - Scalable (economies rather than diseconomies of scale)
 - As simple as using email
 - Leveraging of existing applications such as Doctors Desktop, Quicken and MYOB
- BizDex consists of a governance structure, methodology and set of tools to achieve the above

4

BizDex
www.bizdex.com.au

The Challenge

To reduce set-up costs to the point where genuine system-to-system B2B interoperability may be justified even for low transaction volumes.

5

BizDex
www.bizdex.com.au

The BizDex Strategy

Simplify the Standards Landscape

Automate B2B Set-Up

Spread B2B compliance costs

6

BizDex
